Mentoos Shopify Ecommerce Website

Professional Functional Requirements & Feature Specification

Project Objective

The objective is to develop a **modern, fast, mobile-first and conversion-focused Shopify ecommerce website for Mentoos**, a men's fashion brand.

The website should follow current ecommerce practices used by leading fashion brands, while keeping the customer journey **simple, quick and easy to understand**.

The primary focus should be:

Fast browsing → Easy product discovery → Product confidence → Quick purchase → Secure payment → Easy tracking → Customer retention

---

1. Website Design & User Experience

Requirement

The website should have a clean, modern and premium men's fashion appearance.

Key Requirements

- Mobile-first responsive design
- Fast loading on mobile and desktop
- Clean typography and visual hierarchy
- Simple navigation
- Clear CTA buttons
- Minimum number of clicks to purchase
- Consistent design across all pages
- Optimized images and videos
- Minimal unnecessary animations and pop-ups

Objective

The website should feel **fast, modern and effortless**, particularly for customers shopping through mobile devices.

2. Header & Navigation

Requirement

The navigation should allow customers to reach any major product category quickly.

Main Navigation

- New Arrivals
- T-Shirts
- Shirts
- Trousers
- Joggers
- Activewear
- Ethnic Wear
- Best Sellers
- Sale
- Search
- Account
- Wishlist
- Cart

Additional Requirement

A clean mega menu should be available on desktop, while mobile should use a simple expandable menu.

Objective

Customers should be able to reach a relevant product category within **1–2 clicks**.

3. Smart Search

Requirement

The website should provide a fast and intelligent product search experience.

Features

- Search suggestions while typing
- Product image suggestions
- Search by product name
- Search by category
- Search by color
- Search by SKU/product code
- Popular searches
- Recent searches
- Relevant results for common spelling mistakes

Example

If the customer searches:

"Black Shirt"

the system should show relevant black shirts immediately instead of requiring multiple category selections.

Objective

Reduce the time between **searching and finding the right product**.

4. Homepage

Requirement

The homepage should communicate the brand, collections and best-selling products without becoming overcrowded.

Recommended Structure

1. Main Hero Banner
2. Shop by Category
3. New Arrivals
4. Trending Now
5. Best Sellers
6. Shop by Fit
7. Shop by Style
8. Shop the Look
9. Customer Reviews
10. UGC / Customer Videos
11. Instagram/Social Content
12. Offers
13. Trust Section
14. Footer

Objective

The homepage should help both new and returning customers quickly discover relevant products.

5. Shop by Category

Requirement

Create visual category navigation for the major Mentoos product categories.

Categories

- T-Shirts
- Shirts
- Formal Trousers

- Casual Trousers
- Joggers
- Shorts
- Gym T-Shirts
- Gym Vests
- Sweatshirts
- Jackets
- Kurta
- Kurta Pajama
- Nehru Jackets
- Boxers

Objective
Make product discovery simple and visually appealing.

6. Collection / Product Listing Page

Requirement
Product listing pages should provide customers with all important information without requiring them to open every product.

Product Card Should Display
- Product image
- Product name
- Selling price
- MRP
- Discount percentage
- Rating
- Color
- Available sizes
- Product badges
- Wishlist
- Quick View
- Quick Add

Product Badges
- New
- Bestseller
- Trending
- Limited
- Sale

Objective
Allow customers to compare multiple products quickly.

---

7. Product Filters & Sorting

Requirement
Provide category-specific filters.

Common Filters
- Size
- Color
- Price
- Fit
- Fabric
- Pattern
- Occasion
- Rating

- Discount
- Availability

Sorting

- Recommended
- Newest
- Best Selling
- Price Low to High
- Price High to Low
- Discount
- Customer Rating

Mobile Experience

Filters should be accessible through a simple:
FILTER | SORT
interface.

Objective

Help customers find suitable products without browsing through the entire collection.

8. Product Detail Page

Requirement

The product page should provide enough information for the customer to confidently purchase without needing to contact customer support.

Product Page Should Include

- Multiple product images
- Product video
- Image zoom
- Mobile image swipe
- Product name
- Rating and review count
- Selling price
- MRP
- Discount
- Color selection
- Size selection
- Size Guide
- Model height and size worn
- Product description
- Fabric information
- Fit information
- Wash care
- Delivery information
- Return/exchange information
- Pincode checker
- Wishlist
- Add to Cart
- Buy Now

Objective

Answer the customer's main questions:
What is it?
How does it look?
What size should I buy?
When will I receive it?
Can I return/exchange it?

---

9. Size Guide & Size Selection

Requirement

Size selection should be simple and highly visible.
Example:
S | M | L | XL | XXL
Unavailable sizes should be clearly marked as sold out.

Size Guide

Include relevant measurements such as:

- Chest
- Shoulder
- Length
- Waist
- Hip
- Thigh
- Bottom
- Sleeve

depending on the product category.

Additional Information

- Model height
- Model size worn
- Fit type
- How to measure

Future Enhancement

Find My Size recommendation based on customer measurements.

Objective

Increase purchase confidence and reduce size-related returns/exchanges.

---

10. Quick View

Requirement

Customers should be able to view essential product information without leaving the collection page.

Quick View Should Include

- Product images
- Product name
- Price
- Discount
- Rating
- Color
- Size
- Size Guide
- Add to Cart
- Buy Now
- View Full Product

Objective

Allow customers to compare products faster.

---

11. Quick Add

Requirement

Customers should be able to add products directly from collection pages.

Flow

Quick Add → Select Size → Add to Cart
The customer should not be forced to open the complete product page.

Objective
Reduce shopping friction and increase conversion.

---

12. Shop the Look / Smart Recommendations

Requirement
The website should recommend complementary products based on the product being viewed.

Example
Customer views:
Black T-Shirt
Show:
Complete the Look

- Black T-Shirt
- Casual Trouser
- Sneakers/other relevant products

Provide:
ADD ALL TO CART

Recommendation Logic
Recommendations can be based on:

- Color
- Product category
- Style
- Fit
- Collection
- Frequently purchased combinations
- Customer browsing behaviour

Objective
Increase **Average Order Value (AOV)** and provide styling inspiration.

---

13. UGC & Customer Reviews

Requirement
Create a strong social-proof section throughout the website.

Reviews

- Star rating
- Written reviews
- Customer photos
- Verified Purchase badge
- Review count
- Helpful reviews

UGC Videos
Display customer-created videos in a vertical/Reels-style format.
Each UGC item should ideally contain:

- Customer video
- Product name
- Product image
- Product price
- Shop This Look button

Homepage Section
Suggested heading:
REAL CUSTOMERS. REAL STYLE.
or
WORN BY THE COMMUNITY

Objective

Build customer trust by showing how real customers wear Mentoos products.

---

14. Instagram / Social Commerce Integration

Requirement

Integrate Instagram/social content where technically and commercially supported.

Features

- Display selected Instagram content
- UGC images/videos
- Product tagging where supported
- Link social content to products
- Shop This Look
- Ability for admin to select featured UGC

Important

Social integration should not negatively affect website loading speed. A fallback should be available if the social platform/API is temporarily unavailable.

Objective

Convert social engagement into product discovery and sales.

---

15. Wishlist

Requirement

Customers should be able to save products for future purchases.

Features

- Wishlist button on product cards
- Wishlist on product page
- Save/remove products
- Move wishlist item to cart
- Price-drop alerts
- Back-in-stock alerts

Objective

Increase repeat visits and recover potential future purchases.

---

16. Back-in-Stock Alert

Requirement

When a product or specific size is unavailable, customers should have a:
NOTIFY ME WHEN AVAILABLE
option.

Customer Can Provide

- Mobile number
- Email
- WhatsApp consent where applicable

Notification

When the exact variant becomes available:
Good News! Your Mentoos Black T-Shirt in XL is back in stock.
with:
SHOP NOW

Objective

Recover sales that would otherwise be lost due to out-of-stock inventory.

---

17. Mobile OTP Login

Requirement

Customers should be able to log in without remembering a password.

Flow

Enter Mobile Number → OTP → Login

Account Should Provide Access To

- Orders
- Wishlist
- Addresses
- Returns
- Exchanges
- Order history

Objective

Make registration/login quick and frictionless.

---

18. Cart

Requirement

The cart should be simple and conversion-focused.

Features

- Product image
- Product name
- Size
- Color
- Quantity control
- Remove product
- Move to Wishlist
- Coupon
- Free shipping progress
- Recommended products
- Complete the Look
- Order total
- Checkout button

Example

Add ₹300 more to get FREE SHIPPING

Objective

Increase AOV while keeping checkout simple.

---

19. Express Checkout

Requirement

Customers should have a fast route from product to payment.

Features

- Buy Now
- Express Checkout
- Fast payment options
- Minimum checkout steps
- Guest checkout

Objective

Reduce cart abandonment caused by unnecessary checkout steps.

---

20. Payment Methods

The website should support, subject to the selected Shopify payment provider:

- UPI
- Credit Card

- Debit Card
- Net Banking
- Wallets
- Cash on Delivery
- Supported express payment options

Objective
Give customers familiar and convenient payment options.

---

21. COD Verification & Confirmation Payment

Requirement
To reduce fake COD orders and Return-to-Origin (RTO), introduce a COD confirmation amount.

Example
Order Value: **₹1,499**
COD Confirmation Payment: **₹99**
Amount Payable at Delivery: **₹1,400**

Admin Should Be Able To Configure
- ₹49
- ₹99
- ₹149
- ₹199
- Custom amount
- Percentage-based amount
- Different amounts based on order value

Optional Rules
Different COD requirements can be applied based on:
- Order value
- Pincode
- Customer history
- Risk level

Objective
Reduce fake COD orders and improve COD order confirmation rates.

---

22. WhatsApp Integration

Requirement
WhatsApp should be used as an important customer communication channel.

Transactional Notifications
- Order confirmation
- Payment confirmation
- COD confirmation
- Order packed
- Order shipped
- Out for delivery
- Delivered
- Return/exchange updates

Customer Services
- Order tracking
- Support
- Return/exchange assistance
- Product enquiry

Optional Marketing Notifications
Subject to customer consent:
- New arrivals

- Back in stock
- Price drops
- Offers
- Abandoned cart

Objective
Keep customers informed through a communication channel they actively use.

---

23. Real-Time Order Tracking

Requirement
Create a simple:
TRACK MY ORDER
feature.
Customer should be able to enter:
Order Number + Mobile Number

Tracking Timeline
Order Confirmed
↓
Packed
↓
Shipped
↓
Out for Delivery
↓
Delivered

Additional Information
- Courier partner
- Tracking number
- Expected delivery date
- Current shipment status
- Courier tracking link

Objective
Reduce customer support queries and improve post-purchase experience.

---

24. WhatsApp Order Tracking

The customer should receive messages such as:
Your Mentoos order is out for delivery.
Expected delivery: Today
TRACK ORDER
The button should take the customer to the Mentoos tracking page or appropriate tracking system.

---

25. Delivery / Pincode Checker

Requirement
Product pages should provide:
Enter Pincode → Check Delivery
Display:
- Expected delivery date
- COD availability
- Shipping charges
- Free shipping eligibility

Objective
Give customers delivery confidence before purchasing.

26. Mobile Sticky Add to Cart

Requirement

On mobile product pages, once the main Add to Cart area is no longer visible, display a sticky purchase bar.
Example:
₹999 | ADD TO CART | BUY NOW

Objective

Allow customers to purchase without scrolling back to the top.

---

27. Recently Viewed Products

Requirement

Automatically show products the customer has previously viewed.

Example

RECENTLY VIEWED
Product 1 | Product 2 | Product 3

Objective

Help customers return to products they were comparing.

---

28. Smart Cart Recommendations

Requirement

The cart should provide relevant additional product recommendations.
Example:
Customer adds:
Black T-Shirt
Cart shows:
Complete Your Look
Black Trousers ₹1,299
+ ADD

Objective

Increase average order value without creating unnecessary friction.

---

29. Inventory Management

Inventory must be managed at:
Product + Color + Size level
Example:
Black T-Shirt
S — 10
M — 25
L — 30
XL — 5
XXL — Sold Out

Features

- Automatic stock updates
- Size-level inventory
- Color-level inventory
- Sold-out status
- Back-in-stock alerts

---

30. SEO & Marketing Tracking

The website should be properly configured for:

- SEO-friendly URLs
- Meta titles
- Meta descriptions
- Image ALT text
- Product structured data
- Review structured data
- Breadcrumbs
- Sitemap
- Google Search Console

Analytics

- Google Analytics 4
- Shopify Analytics
- Meta Pixel
- Google Ads conversion tracking

Important Events

- Product View
- Search
- Add to Cart
- Begin Checkout
- Purchase

Objective

Measure:
Visitors → Product Views → Add to Cart → Checkout → Purchase

---

31. Admin Controls

Important features should be configurable without requiring developer intervention.
Admin should be able to manage:

- COD confirmation amount
- Offers
- Coupons
- Free shipping threshold
- Product recommendations
- Shop the Look combinations
- UGC videos
- Homepage products
- Product badges
- Back-in-stock settings
- WhatsApp templates
- Banners
- Featured products

---

32. Performance Requirements

Website speed should be treated as a core requirement, not an optional feature.

Developer Should

- Optimize images
- Optimize videos
- Use lazy loading
- Minimize unnecessary scripts
- Avoid excessive Shopify apps
- Remove unused code
- Optimize fonts
- Minimize third-party scripts

- Test on mobile/4G connections
- Monitor Core Web Vitals

Target

The website should feel **fast and responsive even on average Indian mobile internet connections**.

---

33. Recommended Development Priority

Phase 1 — Essential for Launch

1. Mobile-first design
2. Fast website
3. Clean navigation
4. Smart search
5. Collection filters
6. Product page
7. Size Guide
8. Quick View
9. Quick Add
10. Wishlist
11. Add to Cart
12. Buy Now
13. Express Checkout
14. UPI/Card/COD
15. COD verification + confirmation payment
16. Mobile OTP login
17. WhatsApp notifications
18. Real-time order tracking
19. Back-in-stock alerts
20. Reviews
21. UGC videos
22. Instagram/social integration
23. Shop the Look
24. Smart recommendations
25. Pincode checker
26. Size & color inventory
27. SEO
28. Analytics

Phase 2 — Post Launch

1. Price-drop notifications
2. Recently viewed
3. Advanced product recommendations
4. Frequently Bought Together
5. Customer video reviews
6. Find My Size
7. Personalized recommendations
8. Advanced WhatsApp automation
9. Loyalty program
10. Referral program

Final Customer Journey

The complete Mentoos customer journey should be:

DISCOVER

Instagram / Google / Ads / Homepage

↓
SEARCH & EXPLORE
Search / Categories / Filters
↓
BUILD CONFIDENCE
Photos / Videos / Reviews / UGC / Size Guide
↓
DISCOVER MORE
Shop the Look / Complete the Look / Recommendations
↓
PURCHASE
Quick Add / Buy Now / Express Checkout
↓
PAYMENT
UPI / Card / COD / COD Confirmation
↓
CONFIRMATION
OTP / WhatsApp
↓
TRACKING
Real-Time Tracking / WhatsApp Updates
↓
DELIVERY
Easy Delivery / Exchange / Return
↓
RETENTION
Wishlist / Back-in-Stock / Price Drop / New Arrivals

Core Development Philosophy

The new Mentoos website should be:

FAST
Pages and checkout should load quickly.

SIMPLE
Customers should understand what to do immediately.

MOBILE-FIRST
The mobile experience should be treated as the primary experience.

TRUSTWORTHY
Reviews, UGC, videos, clear delivery and return information should build confidence.

CONVERSION-FOCUSED
Reduce unnecessary clicks and checkout friction.

PERSONALIZED
Use Shop the Look and smart recommendations to show relevant products.

SCALABLE
The website should allow additional features and integrations to be added later without rebuilding the entire platform.

The goal is not to create a website with the maximum number of features. The goal is to create a website where a customer can find a product, trust it, select the correct size and complete the purchase as quickly and easily as possible.
